PROFILE

I have 3 years of working experience as a Software Developer. However, I have been learning and gaining experience in software development for many years prior to this. I have consistently studied, understood, and developed personal projects throughout my journey. This has provided me with a strong understanding of technology trends over the past 10 years, enabling me to effectively apply my experience in my work.

EXPERIENCE

Orisma Technology **2022 – Present**
Develop products for company and their customers.

- Designing project structures and developing core system.
- Using Flutter, React Native, and Vue Native to develop mobile application.
- Maintained legacy codebases to ensure continued usability and support future development.

FPSMember Website **2020 – 2022 (Freelance)**

This project was commissioned by FPSThailand to allow their Twitch members to participate in random prize giveaways from their favorite streamers.

- I was involved in the design and development of the frontend and the prize giveaway algorithm.
- Written with basic HTML, CSS and JS (with jQuery)
- Maintenance while providing service and develop features according to each phase in the time frame.
