PROFILE

I have 3 years of working experience as a Software Developer. However, I started programming since I was 13 years old.
I have been studying, understanding, and developing personal projects throughout my journey. This has given me a strong understanding of technology trends over the past 10 years and allows me to apply my experience effectively to my work.

EXPERIENCE

Orisma Techonology
2022 - Present
Develop products for company and their customers.

- Designing project structures and developing core system.
- Using Flutter, React Native, and Vue Native to develop mobile application.
- Maintained legacy codebases to ensure continued usability and support future development.
